

LittleJuey Straight Shaft - Fitting Instructions

1. Remove existing spool until you have only the a short spindle exposed, you may need a spanner to take off the long spindle
2. If required place a washer in LJ base
3. Attach LJ base with the appropriate left handed nut or bolt to the weedcutter (all included in your pack)
4. Tighten the nut or bolt until secure, this is now centralised to the machine.
5. Attach the LJ head along with the LJ nylon line reload in the holes provided and screw to lock in place. Double up your nylons through the one hole for better cutting power and durability.
